

Please do not replace FM translator service with LPFM in the area of Phoenix, Arizona. K-LOVE is a station that uses FM and serves the community not only with positive music and programming, it also provides calendar announcements for local, free, faith-based events that other wise would not be communicated to the surrounding cities. Without K-LOVE, access to the latest positive music & influences would be severly limited keeping youngsters and adults from hearing from their favorites artists. Young adults in the community need to have an alternative to secular radio as well as the community as whole. The public should know of local non-secular events also.
